CORRECTIONS NEEDED ON THE APP ARE AS FOLLOWS

Tycoon Log-in

1. The entire front-end of the app is not responsive and does not fit effectively to every screen

   Action: Fix front-end ux/ui reduce size of icons so they can all fit to screen including when screen is rotated to portraite

   Please change color to #590b59 a shade of purple as the previous color conflicts with another app in the market just found out.

   When the app is clicked it should appear with background color and logo in center just like the image below.

Second screen of log-in should appear like picture below

2. **<u>My Shops:</u>** when my shop is clicked what you need to see is just

Shop name (name)
Manager
Edit
Action
Remove (id) from the list items there.

<u>Manage accounts General:</u> inside (manage shop) has to contain daily date, and options to approve if account report from manager is okay or not disapproved if it's not okay, for transactions daily.

Change the Funds Available to (Amount funded)
Remove + funds button and add approve/not approve button
To be able to confirm the account/report sent by manager and automatically
it goes back to history after approval.

Account History: This has to have 365 days history.

And should appear in the format in the sheet below

Business performance: has to pool data from turnovers of different
products entered by manager and plot a graph for every 4 weeks interval
from the first monday of the month to the last monday of the month.

Manage Managers: Didn't see where you can delete managers .
Remove id its not necessary

Manage cashier :   Informations needed to add cashier should just be limited to

Cashier name
Cashier serial number (cashier no:)
Remove every other detail they are not important

Manage Products: Remove every other detail/field just leave

Product name

MANAGERS APP

Balance Account:
change funds available to Amount Funded
Refer back to flow chart
Add a winning field

TURNOVERS: Refer back to the flow chart;

When turnover is clicked you should see a list of cashiers

when you click on a cashier, you see a list of different products as added by the shop owner to the shop;

Then you can now add turnover for each cashier with respect to products.

Turn the report button to account history cashier has no business with report.

For alarms and reminders I guess we can only text when the app is merged.
